False Alert Statistics

Non-Distress Beacon Counts

False Alert Rate by Beacon Type vs. Registrations by Beacon Type 2015

ELTs	<u>2015</u>
% of Total False Alerts	61%
% of Total Beacons Registered which are ELTs	18%
EPIRBs	<u>2015</u>
% of Total False Alerts	31%
% of Total Beacons Registered which are EPIRBs	45%
PLBs	<u>2015</u>
% of Total False Alerts	8%
% of Total Beacons Registered which are PLBs	37%

National Use Beacons

- When a US Government Agency orders beacons, ask the buyer to contact NOAA to ensure that:
 - Special coding and processing is considered
 - They understand the C-S system and how alerts from their beacons will be distributed
 - They understand beacon operation and do not generate false alerts
 - They are aware of **and** follow proper test policies
 - The beacons are properly registered
 - Proper procedures are followed for:
 - Battery replacement and disposal
 - Beacon replacement and disposal

NOAA's Beacon Registration Database

Checksum Implementation

- The registration form (approved by OMB) contains a 5-digit checksum field, which is used to verify the 15-hexadecimal beacon ID
- The checksum is currently provided by a few manufacturers
- Initial RGDB logic requiring checksum entry confused owners
- Currently, a new registration is accepted regardless of whether the checksum value is correct, incorrect, or absent; this minimizes owner confusion and frustration, so that the owner does not skip registration.
- NOAA contacts owners where the CheckSum values they provide does not match the calculated CheckSum value
 - This check has proved to be VALUABLE!

Beacon Manufacturers' Checksum Implementation

- NOAA has started the Code of Federal Regulations (CFR) process for mandating that checksum be used for most new beacons
- In preparation, NOAA requests that manufacturers start generating checksum values for their new beacons
- Refer questions on implementing the checksum to:
Jesse Reich, SARSAT Ground System Engineer
jesse.reich@noaa.gov

Ways Beacon Manufacturers & Service Centers Can Help NOAA's RGDB (1 of 2)

- Contact NOAA immediately when an issue arises that has a direct impact on beacon owners, such as:
 - Duplicate beacon IDs encoded into beacons
 - Mislabeling of beacon IDs on forms or beacons
 - Recalls of beacons you have manufactured
- Ensure that the UIN label is legible and affixed to the blank registration form.
 - Consider using a font type, where the zero and the number 8 stand out. Owners often confuse zero with letter “O” and 8 with letter “B”.

Ways Beacon Manufacturers & Service Centers Can Help NOAA's RGDB (2 of 2)

- Consider ideas to make your manufacturer UIN stand out on both the beacon and the registration form
- Consider putting bar codes on the beacon label and/or form since NOAA will be using bar code readers to increase speed and accuracy
- Verify NOAA decal currency and remind the owner, if appropriate, to update the beacon's registration with NOAA, especially if a different beacon is returned to the owner
- Provide NOAA the UINs for beacons received from an owner that will not be returned to the registered owner
- Inform retailers the importance of placing correct registration forms back into the box for opened boxes on their site

New RGDB Website Improvements (1 of 2)

- The revised RGDB user interface, unveiled on May 9th will result in more accurate registration information by:
 - Allowing owners to gain access to their registration information using a challenge question-and-answer sequence
 - Including more online real-time transparent checks to alert registrants to look for and correct inconsistencies, such checking the beacon ID when the beacon ID and CheckSum combination fails

New RGDB Website Improvements (2 of 2)

- Providing the means to make it easier for the latest beacon possessor to notify NOAA about their interest in registering a beacon; if a beacon transfer has not been confirmed, the new owner's information can be entered and later accepted by NOAA after the transfer confirmation from registered owner is confirmed
- Generating customized letters to owners
- Providing information relevant to testing and proper disposal, which may result in fewer false alerts

30 September 2015

Dear John Doe:

Thank you for submitting your 406 MHz emergency beacon registration. Please take a few moments now to verify your beacon ID, check/update your registration information, and attach your registration decal to your beacon.

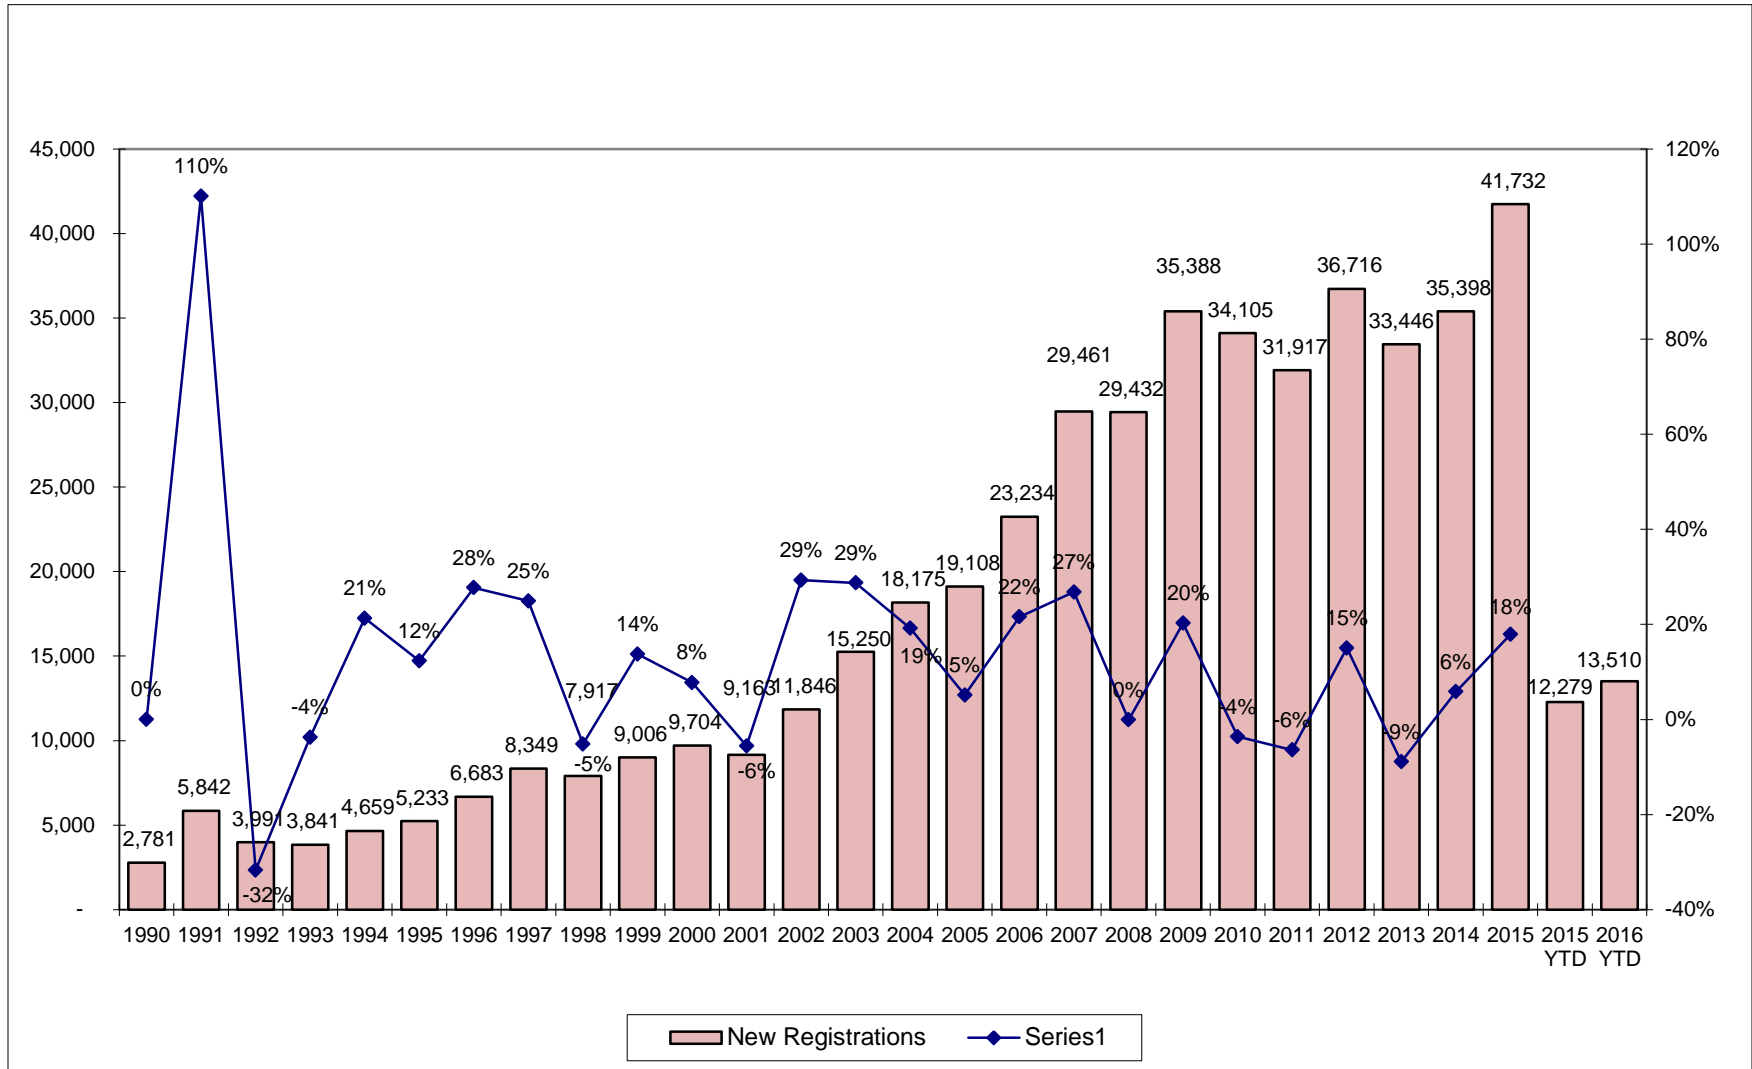

Registration Database Statistics

Statistics on Registration Renewals April 2015 to April 2016

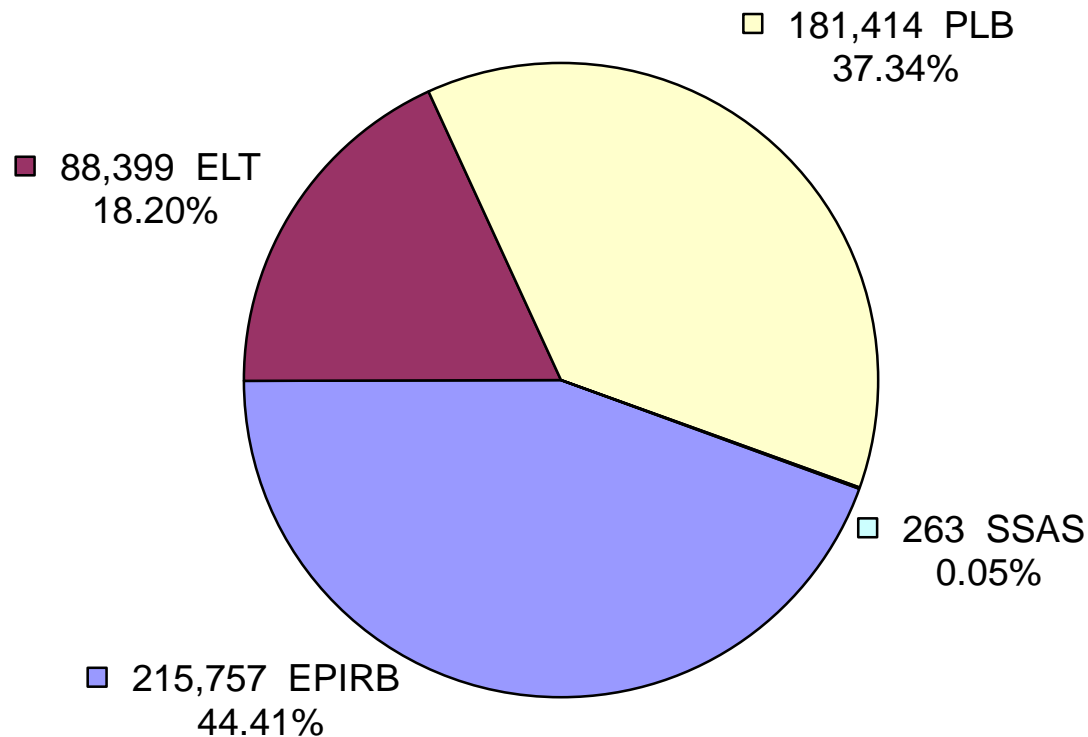

<u>Month/Year</u>	<u>Updated by Owners Through Website</u>	<u>Updated by NOAA</u>	<u>Total Registrations Renewals</u>	<u>Percentage Updated by Owners Through Website</u>	<u>Percentage Updated by NOAA</u>
Apr-15	12,661	4,140	16,801	75%	25%
May-15	13,579	2,953	16,532	82%	18%
Jun-15	12,046	4,021	16,067	75%	25%
Jul-15	11,083	3,435	14,518	76%	24%
Aug-15	10,677	3,358	14,035	76%	24%
Sep-15	10,358	3,591	13,949	74%	26%
Oct-15	9,770	3,292	13,062	75%	25%

Dec-15	9,171	3,456	12,627	73%	27%
Jan-16	10,825	3,135	13,960	78%	22%
Feb-16	10,802	4,063	14,865	73%	27%
Mar-16	11,968	4,535	16,503	73%	27%
Apr-16	12,035	4,386	16,421	73%	27%

New Registrations by Year as of April 2016

Distribution of Registered Beacons by Beacon Type as of April 2016

New Beacon Registrations 2001 - 2015

Registration Statistics Available on the SARSAT Website

- Registration statistics are updated on a monthly basis on the NOAA SARSAT website (www.sarsat.noaa.gov) under “Other Resources” / “SARSAT Statistics” (<http://www.sarsat.noaa.gov/statistics.html>)
 - New Beacon Registrations by Type
 - This is a table of first-time registrations of beacons, listed by type of beacon, for each month from January 2010 through the most recent month
